

ULTIMA

Swimming Pool

The **ULTIMA Swimming Pool Controller** series are professionally designed to provide consistent and reliable control on all pool functions, while at the same time being flexible and user friendly.

From the smallest Spa to the largest Aquatic facility, an Ultima system is available to suit your needs.

ULTIMA Swimming Pool

The **ULTIMA Swimming Pool Controller** gives you the ability to monitor and control your pool from the controllers 7 inch touch screen or over the web by continuously logging and graphing sensor readings and dose pump activity in easy to understand graphs. This allows the user to hone in and customise pump duties and dosing activity to minimise chemical usage and maximise efficiency.

Specifications

- 7" colour touch screen operation
- User friendly navigation
- Quick installation with no electrician required
- Upgradable to more advanced models
- Remote access options (Modem, Wi-Fi, Ethernet)
- USB port to download data or upload settings
- Historical trend graphs on screen
- "Quick" or "Precise" calibration options
- Interlockable output functions
- Multilayer password protection
- Multiple timer options

Models

- **PRO:** For use with 4-20mA sensors including FAC membrane sensors
- **UFL/UFC:** FAC control for liquid or granular chlorine/Chlorinators
- **UPL/UPC:** ORP control for liquid or granular chlorine/Chlorinators
- **USPA:** Spa controller with Bromine feeder

Parameters Controlled

- Free Available Chlorine (FAC)
- ORP
- Single pH
- Dual pH
- Backup chlorination
- Conductivity/TDS
- Add sensors or hardware to customise your PRO controller
